

*within your skin*

Natural beauty doesn't hide under thick foundations! Spring is all about taking what you've got and running with it - fresh-faced, footloose and fancy-free. If you like mineral powder foundations, try mixing a teensy bit with your moisturiser for a sheer, healthy glow. Or take the easy route and find a feather-light liquid tint, like the tinted moisturisers and illuminators from *livingnature.com*. A berry pout and you're ready to frolic in the flowers! Viva la Spring!
